

SIWEX SIWES placement finder

A web app that helps Nigerian students find SIWES placements in tech hubs, and helps hubs pick and track their interns.

300 level project documentation

Live app: <https://siwex-production.up.railway.app>

Demo student: imaobong@siwex.ng / demo1234. Demo hub: start@siwex.ng / demo1234

1. Overview

Every Nigerian university student in a technical course must do SIWES (Students Industrial Work Experience Scheme), usually 12 or 24 weeks. Finding a placement is mostly word of mouth: students walk from office to office with letters, and hubs get applications they cannot track.

SIWEX puts the tech hubs of Uyo, and a few beyond, in one directory. Students filter hubs by city and track, see which roles still have slots, apply with a short note and follow every reply on one dashboard. Hubs post openings, accept or reject applicants, and watch their interns progress week by week.

Users and roles

Role	Can do
Visitor	Browse and search hubs and openings.
Student	Register with school, course, level, city and SIWES length. Apply, withdraw, see recommendations and placement progress.
Hub	Register a hub profile. Post openings, accept or reject applications, see interns and their progress.

Hubs in the demo data

Hub	City	Address	Source
Start Innovation Hub	Uyo	Plot 6, Unit C, Ewet Housing Estate	Verified on starthub.com.ng
The RootHub	Uyo	AKEES Plaza, opposite Ibom Hall, IBB Avenue	Verified on public business listings
Futtybills	Uyo	Nwaniba Road (to be confirmed)	Named in the brief. No public listing found, so the address is marked unconfirmed
Square One	Uyo	Oron Road (to be confirmed)	Named in the brief. No public listing found, so the address is marked unconfirmed

Chainspace HQ	Uyo	Udo Udoma Avenue (to be confirmed)	Found as an Uyo co-working space; street not confirmed
Co-Creation Hub	Lagos	294 Herbert Macaulay Way, Yaba	Verified, public address

Openings, stipends, students and applications are sample data for the demo. They are not real offers from these hubs.

2. How the core logic works

All business rules live in `src/lib/rules.ts` as pure functions. None of them reads the clock or the database: the caller passes "today" as a `YYYY-MM-DD` string. In the app, today comes from `getToday()`, which returns `SIWEX_TODAY` when it is set and otherwise the current date in Lagos. This makes the demo and the tests repeatable.

Opening status

Status	Rule
Closed	Today is after the deadline. Checked first, so a closed opening with free slots still shows Closed.
Full	Accepted applications equal the number of slots.
Closing soon	7 days or less to the deadline (the deadline day counts as open).
Open	Everything else.

Can a student apply? (`checkCanApply`)

The checks run in this order and the first failure is shown to the student in plain words:

1. The opening is not closed.
2. The opening is not full.
3. The student has not already applied to it (a withdrawn application can be sent again).
4. The student does not already have an accepted placement.
5. The student has fewer than 3 pending applications, so nobody hoards slots.
6. The placement is at least as long as the student's SIWES (a 12 week opening cannot satisfy a 24 week SIWES).

Other rules

Function	What it does
<code>applicationDisplay</code>	A pending application older than 10 days shows as "No response yet" to both sides.
<code>checkCanDecide</code>	A hub can only decide pending applications, and cannot accept once the opening is full.
<code>placementProgress</code>	From start date and length: not started (with days to go), in progress (week N of M and percent), or completed.
<code>matchScore</code>	0 to 100. 50 if the track is the top fit for the course (35 for another good fit), 30 for the same city, 20 if the placement covers the SIWES length. Used to rank recommendations and shown to hubs.

The same rules run twice: once to decide what the page shows (for example, hide the apply form and explain why), and again inside the Server Action before anything is written, so a stale page cannot break a rule.

3. Architecture and data model

Browser

- Server rendered pages
- Small client forms using `useActionState`
- HTTP-only session cookie

Next.js 16 (App Router)

- Server Components read data
- Server Actions write data
- `proxy.ts` guards `/student` and `/hub`
- `/api/health` pings the database

PostgreSQL

- Drizzle ORM queries
- drizzle-kit SQL migrations in `/drizzle`
- Hosted on Railway

Folder	Contents
<code>src/lib/rules.ts</code>	Pure business rules (status, apply checks, progress, match score).
<code>src/lib/dates.ts</code>	Date helpers and <code>getToday</code> with <code>SIWEX_TODAY</code> support.
<code>src/lib/data.ts</code>	All database reads and writes. Every user query is filtered by the signed-in user id.
<code>src/lib/validation.ts</code>	Zod schemas for every form and a helper that turns issues into field errors.
<code>src/lib/session.ts</code> , <code>auth.ts</code>	JWT signing with <code>jose</code> , cookie handling, role guard.
<code>src/app</code>	Pages, Server Actions (<code>actions.ts</code>) and the health route.
<code>src/db</code>	Drizzle schema, connection and demo seed data.

Tables

Table	Key columns	Notes
users	id, email (unique), password_hash, name, role	role is student or hub. Passwords hashed with <code>bcryptjs</code> .
students	user_id (PK, FK users), school, course, level, city, required_weeks	One row per student user.
hubs	id, owner_user_id (unique FK), slug, name, city, state, address, address_verified, about, tracks[], color	One hub per hub user.
openings	id, hub_id, title, track, slots, duration_weeks, start_date, deadline, stipend_naira	Status is computed, never stored.
applications	id, opening_id, student_user_id, status, note, applied_on, decided_on	Unique on (opening_id, student_user_id). Status: pending, accepted, rejected, withdrawn.

Security

- Sessions are HS256 JWTs signed with `SESSION_SECRET`, stored in an HTTP-only, `SameSite=Lax` cookie (Secure in production) for 7 days.

- proxy.ts redirects signed-out visitors away from dashboards; each page and action checks the role again.
- Hub actions join through hubs.owner_user_id, so a hub can never decide another hub's applications. Students can only withdraw their own.

4. Walkthrough of every screen

Screenshots were taken with Playwright against the demo data with SIWEX_TODAY=2026-10-02. Numbers on each image match the notes below it.

4.1 Home page

The landing page a student sees first. It explains the product in one line and lets them search straight away.

The screenshot shows the SIWEX home page. At the top, there's a navigation bar with the SIWEX logo, 'Hubs', 'Join', and a 'Sign in' button (annotated with a red circle and '4'). The main hero section has a blue-to-purple gradient background. It features the heading 'Find your SIWES placement in a tech hub near you' and a subtext: 'Browse hubs in Uyo and across Nigeria, see which roles still have slots, apply in one step and track every reply in one place.' Below this is a search bar (annotated with a red circle and '1') containing the text 'Search hubs, e.g. RootHub or design' and a 'Search' button. Under the search bar are three live count buttons: '6 hubs', '25 open slots', and '4 students placed' (annotated with a red circle and '2'). To the right of the search bar is an illustration of a person at a laptop with a map overlay. The 'Hubs with the most open slots' section (annotated with a red circle and '3') displays three hub cards: 'Start Innovation Hub' (2 open roles, 6 slots left), 'Futtybills' (2 open roles, 5 slots left), and 'Chainspace HQ' (2 open roles, 4 slots left). Each card lists specific roles. A 'See all hubs' link is at the top right of this section. Below is the 'How it works' section with three steps: 1. Find a hub, 2. Apply once, and 3. Get placed, each with a brief description. At the bottom, a footer contains the text 'SIWEX. A 300 level project for finding SIWES placements in Nigerian tech hubs.' and a 'Status' link.

- 1 Search box. Sends the student to the hub directory with the keyword filled in.
- 2 Live counts from the database: hubs listed, open slots left and students already placed.
- 3 Hub cards sorted by open slots. Each shows tracks offered and slots left.
- 4 Sign in. The demo account is filled in on the next page.

4.2 Hub directory

All hubs with filters for keyword, city and track. The filters are plain query parameters, so a filtered list can be shared as a link.

SIWEX. A 300 level project for finding SIWES placements in Nigerian tech hubs. Status

- 1 Keyword, city and track filters. Selects stay uncontrolled so a form submit never wipes them.
- 2 Number of hubs matching the filters.
- 3 Slots left across all live openings at the hub. Grey when nothing is open.
- 4 Green tick: the street address was checked against a public source.

4.3 Hub page

Every opening at a hub with its status, slots, length, stipend and deadline. Live openings are listed first.

The screenshot displays the 'Start Innovation Hub' page on the SIWEX platform. The header includes the SIWEX logo, navigation links for 'Hubs', 'Join', and 'Sign in', and the hub's name 'Start Innovation Hub' with its location 'Uyo, Akwa Ibom'.

Openings

- Frontend Developer Intern (React)** (Status: Closing soon)
 - Software Development
 - Build pages and components for client projects with React and TypeScript. You will pair with a mentor, review pull requests and present a demo every two weeks.
 - 4 of 4 slots left | 24 weeks | Starts 1 Nov 2026 | NGN 30,000 / month
 - Apply by 5 Oct 2026 (in 3 days)
 - Sign in as a student to apply
- UI/UX Design Intern** (Status: Open)
 - UI/UX Design
 - Design screens in Figma, run quick user tests with traders in Uyo markets and hand off designs to the development team.
 - 2 of 2 slots left | 24 weeks | Starts 1 Nov 2026 | NGN 25,000 / month
 - Apply by 22 Oct 2026 (in 20 days)
 - Sign in as a student to apply
- Digital Marketing Intern** (Status: Closed)
 - Digital Marketing
 - Plan social media content, write copy and track campaign results for hub programmes and partner startups.
 - 0 of 2 slots left | 12 weeks | Starts 28 Aug 2026 | NGN 20,000 / month
 - Closed on 18 Aug 2026

About

Start Innovation Hub is a growth accelerator and NBTE approved skills training centre in Uyo. It runs training in web and mobile development, product design and digital marketing, with co-working space for startups.

- 1 Status badge worked out from the deadline and accepted count: Open, Closing soon (7 days or less), Full or Closed.
- 2 Slots left, placement length, start date and monthly stipend in naira.
- 3 Deadline with a countdown relative to today.
- 4 Visitors who are not signed in are asked to sign in as a student.
- 5 Address verified badge. Hubs whose address could not be confirmed show Address to be confirmed instead.

4.4 Sign in

Email and password sign in. The demo login is pre-filled so the presenter only clicks one button.

The screenshot shows the SIWEX sign-in interface. At the top left is the SIWEX logo. At the top right are links for 'Hubs', 'Join', and a 'Sign in' button. The main content area has a blue-to-purple gradient background. In the center is a white card titled 'Welcome back' with the subtitle 'Sign in to apply for placements or manage your hub.' Below the title are two tabs: 'Student demo' (highlighted with a red circle 1) and 'Hub demo'. Below the tabs is a text box (highlighted with a red circle 2) containing the pre-filled demo login: 'Demo login is filled in: imaobong@siwex.ng / demo1234'. Below this are input fields for 'Email' (containing 'imaobong@siwex.ng') and 'Password' (containing dots). A red circle 3 highlights the 'Sign in' button. At the bottom of the card is a link: 'New here? [Create an account](#)'. The footer contains the text 'SIWEX. A 300 level project for finding SIWES placements in Nigerian tech hubs.' and a 'Status' link.

- 1 Switch between the student demo and the hub demo account.
- 2 The demo credentials, shown in plain text for the presentation.
- 3 Sign in. On success a signed JWT is stored in an HTTP-only cookie.

4.5 Create an account

Students and hubs register on the same page. Zod validates every field on the server and errors appear under each field.

4.8 Hub dashboard

Signed in as Mfon Udoh of Start Innovation Hub. The hub reviews applications, watches interns progress and posts openings.

The dashboard is titled "Start Innovation Hub" and shows the user is signed in as Mfon Udoh. It features a top navigation bar with "Hubs", "Dashboard", and a "Sign out" button. The main content area is divided into several sections:

- Summary Metrics:** A row of four cards showing: 2 Live openings, 4 Pending applications, 1 Waiting over 10 days, and 2 Accepted interns.
- Applications to review:** A list of three applications. The first application, Ekemini Akpan, is highlighted with a red box and a "No response yet" flag. It shows a 100% match and "Accept" and "Reject" buttons. The second application, Chiamaka Obi, is pending. The third application, Imaobong Udo, is also pending. The fourth application, Aniekan Bassey, is pending.
- Your openings:** A list of three openings: "Frontend Developer Intern (React)" (Closing soon), "UI/UX Design Intern" (Open), and "Digital Marketing Intern" (Closed).
- Post a new opening:** A form to create a new opening. It includes fields for "Role title", "Track", "Length", "Slots", "Monthly stipend (NGN, 0 if unpaid)", "Application deadline", and "Start date". There is a "Publish opening" button at the bottom.
- Interns:** A section showing the progress of two interns: "Nsikak Etim" and "Fatima Bello". Each has a progress bar and a "Week 6 of 12" indicator.

At the bottom, there is a footer with the text "SIWEX. A 300 level project for finding SIWES placements in Nigerian tech hubs." and a "Status" link.

- 1 Live openings, pending applications, applications waiting more than 10 days and accepted interns.
- 2 Flag on an application left unanswered for over 10 days.
- 3 Accept or reject. Accepting is refused once the opening is full.
- 4 Intern progress: week number and a bar computed from the start date and length.

- 5 Post a new opening. Zod checks that the deadline is before the start date and not in the past.

4.9 After a hub accepts

The hub accepted Imaobong for the Frontend Developer role. Her dashboard now shows the placement with a countdown to the start date.

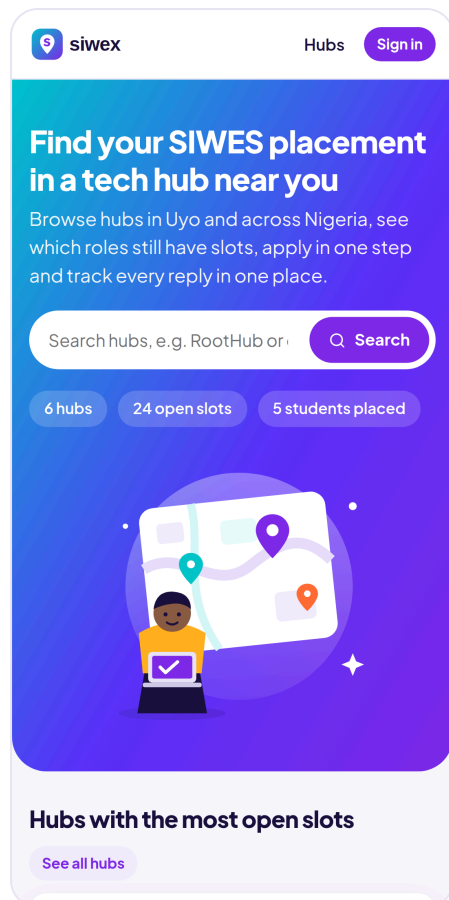

The dashboard for user Imaobong shows the following details:

- Header:** siwex logo, Hubs, Dashboard, Imaobong profile, and Sign out button.
- Greeting:** Hello, Imaobong. 300 level Computer Science, University of Uyo. Uyo. SIWES: 24 weeks.
- Your placement:**
 - SI Frontend Developer Intern (React)
 - Start Innovation Hub, Plot 6, Unit C, Ewet Housing Estate, Uyo
 - 1 Nov 2026 to 17 Apr 2027. NGN 30,000 / month.
 - Starts in 30 days (1)
- My applications:**
 - 1 of 3 pending allowed
 - 1 application has had no reply for over 10 days. Consider applying elsewhere.
 - SI Frontend Developer Intern (React): Start Innovation Hub - applied 28 Sep 2026 (4 days ago). Accepted (3)
 - SO Product Design Intern: Square One - applied 16 Sep 2026 (16 days ago). No response yet. Withdraw button.
 - CC Software Engineering Intern: Co-Creation Hub - applied 2 Sep 2026 (30 days ago). Not selected.
- Recommended for you:**
 - Ranked by your course, city and SIWES length.
 - Junior Software Engineer Intern: 100% match. Futtibills - Software Development. Open. Apply by 20 Oct 2026.
 - Cloud and Networking Intern: 85% match. Chainspace HQ - Networking and Cloud. Closing soon. Apply by 8 Oct 2026.
 - Data Analyst Intern: 85% match. Futtibills - Data Analysis. Open. Apply by 20 Oct 2026.
 - UI/UX Design Intern: 85% match. Start Innovation Hub - UI/UX Design. Open. Apply by 22 Oct 2026.
- Footer:** SIWEX. A 300 level project for finding SIWES placements in Nigerian tech hubs. Status link.

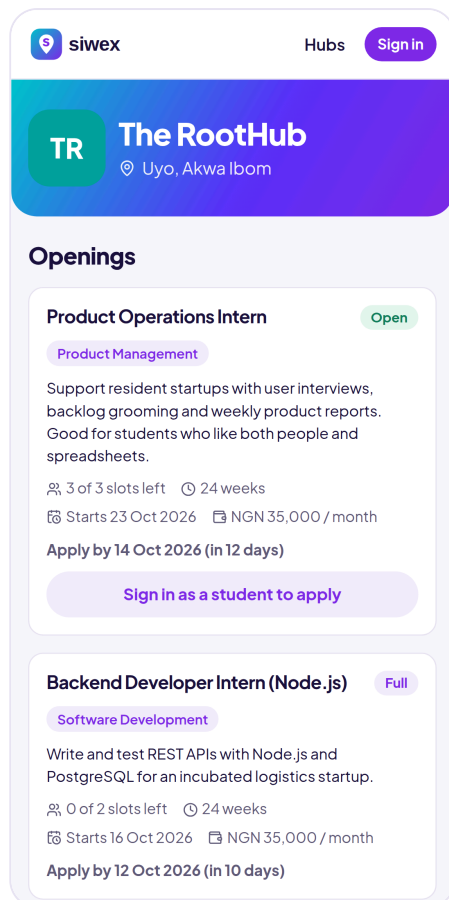

- 1 Countdown to the start date. During the placement it shows Week N of M.
- 2 Progress bar for the whole placement.
- 3 The application is now Accepted. The student cannot apply anywhere else.

5. Mobile view

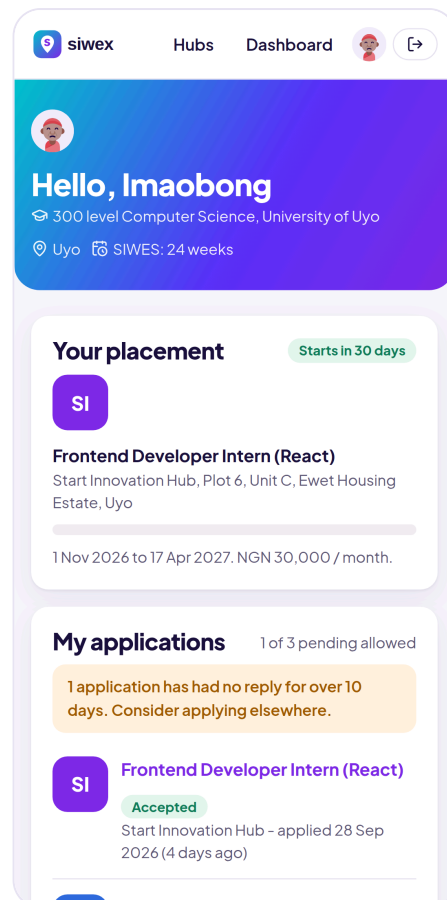

The layout is a single column under 760px wide. Grids use `minmax(0, 1fr)` so long text and lists never push the page sideways, and the header hides secondary links. A Playwright test on a Pixel 7 viewport checks that the page has no horizontal scroll.

Home

Hub page

Student dashboard with placement

6. Running locally

```
service postgresql start
sudo -u postgres createdb siwex
sudo -u postgres createdb siwex_test
cp .env.example .env          # edit DATABASE_URL if needed
npm install
npm run db:migrate
npm run db:seed                # wipes and reseeds demo data
npm run dev                    # http://localhost:3000
```

Variable	Purpose
DATABASE_URL	Postgres connection string for the app.
TEST_DATABASE_URL	Separate database used by integration and e2e tests.
SESSION_SECRET	Secret for signing session tokens (16+ characters, required in production).
SIWEX_TODAY	Optional YYYY-MM-DD date that pins "today" for demos and tests.

Script	What it does
npm run dev / build / start	Next.js development, production build, production server.
npm run db:generate	Create a new SQL migration from schema changes.
npm run db:migrate	Apply migrations.
npm run db:seed / db:seed:if-empty	Reseed demo data / seed only an empty database.
npm test	Vitest unit and integration tests.
npm run test:e2e	Playwright end-to-end tests on desktop and mobile.
npm run docs:build	Rebuild this PDF and the slide deck (run npm run build first).

7. Testing

Suite	Tool	Tests	Covers
Unit	Vitest	41	Dates and SIWEX_TODAY, every rule in rules.ts, Zod schemas, JWT sign and verify.
Integration	Vitest + real Postgres (siwex_test)	18	Search and filters, sign up and login, apply limits, withdraw scoping, recommendations, hub decisions, cross-hub access is refused, opening creation.
End to end	Playwright, production build	17 (14 desktop, 3 mobile)	Home, directory filters, demo login pre-fill, inline validation, apply flow, accept and reject, posting an opening, auth redirects, health check, no sideways scroll on mobile.

All 76 tests pass. Integration and e2e tests reseed the test database before each test, with today fixed at 2026-10-02.

```
npm test          # 59 passed (41 unit + 18 integration)
npm run test:e2e  # 17 passed
```

8. Deployment

The app runs on Railway in the project "school-projects", connected to the GitHub repository so every push redeploys.

1. A PostgreSQL service is provisioned in the project.
2. The app service has `DATABASE_URL=${{Postgres.DATABASE_URL}}`, a random `SESSION_SECRET` and `NODE_ENV=production`.
3. `railway.json` builds with `npm run build`. The start command runs migrations, seeds demo data only if the database is empty, then runs `next start -H 0.0.0.0`.
4. Railway calls `/api/health`, which runs `select 1` against the database, before switching traffic to a new deployment.

Live URL: <https://siwex-production.up.railway.app>

9. Five minute presentation script

Time	Say and do
0:00–0:30	Problem. "Every one of us needs a SIWES placement. Today it is letters and word of mouth, and hubs lose track of applications." Show the home page.
0:30–1:15	Directory. Click Hubs. Filter by Uyo, then by Software Development. Point at the slots left badge and the verified address tick. Open Start Innovation Hub and show Closing soon, Open and Closed badges.
1:15–2:15	Student. Click Sign in; the demo login is already filled. On the dashboard point at the "no reply for over 10 days" warning and the match scores. Open Futttybills, apply with a too-short note to show the inline error, then a proper note. Show it on the dashboard and that the pending cap now blocks a fourth application.
2:15–3:15	Hub. Sign out, choose Hub demo, sign in. Walk the four stat cards. Accept Imaobong. Point at the interns list and progress bars. Post a new opening, show the deadline rule error, then publish.
3:15–3:45	Back to the student. Sign in as Imaobong again and show the placement card counting down to the start date.
3:45–4:30	How it works. Show the architecture slide: Next.js Server Components and Server Actions, Drizzle and Postgres on Railway, rules as pure functions with a pinned "today", 76 automated tests.
4:30–5:00	Wrap up. Phone view of the site, what we would add next (logbook upload, school supervisor sign-off, hub verification), then questions.

10. Decisions and limits

- Futttybills and Square One were named in the brief but have no public listing that we could find, so their street addresses are placeholders and marked "Address to be confirmed" in the app.
- A student can hold at most 3 pending applications and only one accepted placement. A pending application is flagged after 10 days. Openings are "closing soon" from 7 days before the deadline.
- SIWES length is 12 or 24 weeks. A placement shorter than the student's SIWES is blocked.
- Stipends are monthly, in naira, shown as "NGN 30,000 / month"; 0 means unpaid.
- Hub logos are coloured initials and avatars are generated locally with DiceBear, so the site makes no image requests to outside servers.
- Not built: password reset, email notifications, file uploads (CV, logbook) and admin verification of hubs.
